

- A:** Area of special flood hazard (WITHOUT) water surface elevations determined.
- AE:** Area of special flood hazard (WITH) water surface elevations determined .
- AH:** Areas of special flood hazards having shallow water depths and/or unpredictable flow paths between 1 – 3 feet, and with water surface elevations determined.
- 0.2 PCT ANNUAL CHANCE FLOOD HAZARD:**
Areas of moderate flood hazards between the limits of the base flood and the 0.2-percent-annual-chance (or 500-year) flood.
- X:** An area that is determined to be outside the 100- and 500-yearfloodplains.
- FLOODWAY:**
An area that includes the channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the baseflood without cumulatively increasing the water-surface elevation by more than a designated height. (Note: this area is normally in Zone AE.)
